SUMMARY

Full-Stack JavaScript developer with hands-on experience building modern, scalable web applications using **React, Node.js, Express, and PostgreSQL**. Strong understanding of APIs, authentication, and deployment workflows.

I transitioned into IT after discovering how technology can automate work and solve real business problems. My previous experience in operations helped me develop **precision, problem-solving, and fast learning abilities**, which now strengthen my engineering approach.

Passionate about creating impactful digital products and continuously learning new tools to deliver high-quality solutions.

EDUCATION

Hacktiv8   **Jakarta, Indonesia**
Full Stack JavaScript Immersive Program ([Transcript](#))   *August 2025 – November 2025*

Universitas Trisakti   **Jakarta, Indonesia**
Bachelor of Informatics Engineering   *2018 – 2022*

WORK EXPERIENCE

PT. Kinaro Logistics Indonesia   **Bekasi, Indonesia**
Admin Staff   *February 2025 – July 2025*
- Operated logistics and monitoring software *(e.g., internal WMS system)* to track daily shipments.
- Created **3–5 administrative and operational reports per day** for the head office.
- Acted as PIC for external vendors (transportation, courier partners), ensuring timely resolution of issues.

PT. Reycom Document Solusi   **Bekasi, Indonesia**
Operator Data Enrty   *July 2024 – November 2024*
- Checked and validated **1,000+ documents per day**, ensuring data accuracy before system input.
- Prepared, sorted, and categorized physical and digital documents for processing.
- Resolved data discrepancies, incomplete information, and mismatched records to maintain high accuracy.

PT. Sawerandah Workerpreneur Indonesia   **Bekasi, Indonesia**
Finance   *October 2022 – Mei 2024*
- Prepared monthly financial reports, expense summaries, and transaction documentation.
- Created **daily administrative reports** to support operational and finance activities.
- Coordinated with internal departments to ensure timely submission of finance-related documents.

PT. Emsada Cipta Lestari   **Bekasi, Indonesia**
Intern   *August 2021 – September 2021*
- Created the company website using HTML, CSS, and JavaScript.
- Developed the company profile website to support marketing and branding initiatives.
- Collaborated with the internal team to gather requirements and ensure accurate content delivery.

SKILLS

Language: JavaScript
Front End: React JS, Redux, Vue, React Native, HTML & CSS, Apollo Client
Back End: Node JS, Express, Sequelize, PostgreSQL, GraphQL, Apollo Server, MongoDB, Redis, Rest API, Socket.Io

PROJECTS

KarirKit – AI-Powered Career Assistant Platform - Full Stack   *November 2025*
Built a full-stack platform that analyzes job descriptions and employment contracts to provide personalized career insights, including clause detection and salary benchmarks. Implemented Google OAuth, contract upload, AI-powered analysis, and a responsive dashboard UI. Developed secure APIs, file processing, and role-based access.
Tech stack: Next.js, Node.js, Express, MongoDB, Tailwind CSS, Shadcn UI, JWT Auth

Vinnojaya Biro Jasa – Online Vehicle Administration Platform - Full Stack   *November 2025*
Developed a full-stack platform for vehicle administration services such as STNK renewal, Balik Nama, BPKB updates, and plate processing. Built multi-step forms, document upload, branch selection, order tracking, and automated email notifications. Designed a mobile-optimized UI and secure admin APIs.
Tech stack: React.js, Node.js, Express.js, PostgreSQL, Bootstrap

On Cloud E-Commerce (On-Running Shoes) - Full Stack   *November 2025*
Developed a modern e-commerce platform featuring product listing, dynamic category routing, search overlay, and hero banner sections. Designed a premium, responsive UI using Tailwind CSS + DaisyUI aligned with On Cloud brand identity. Implemented reusable components, product cards, sorting/filtering logic, and smooth user navigation.
Tech stack: Next.js, Tailwind CSS, DaisyUI, MongoDB

LinkedIn-Themed Social Media App - Full Stack   *October 2025*
Developed a LinkedIn-style social media platform with features such as user profiles, posts, reactions, comments, and real-time updates. Built authentication and authorization using JWT, integrated MongoDB for scalable data storage, and implemented Redis to optimize caching and session handling. Created mobile client using React Native & Expo, ensuring smooth UI interactions and responsive design. Deployed both client and server into production environments with environment-based configurations.
Tech stack: React Native, Expo, Express.js, MongoDB, Redis, JWT

Tic-Tac-Toe Realtime App - Backend Only / Captain Dev   *October 2025*
Created a real-time multiplayer web game with live state synchronization using WebSocket.
Tech stack: ReactJS, Express.js, PostgreSQL, Socket.io, Jest, AWS

Spotipy – AI-Powered Music Recommender - Full-Stack   *October 2025*
Developed an AI-driven playlist generator using Google Gemini and Spotify APIs. Implemented JWT authentication and dynamic mood analysis for personalized recommendations.
Tech stack: React Native, Expo, Redux, 3rd party API for server-side
